ORIGINAL

Hello: Commissioners

I have just sent in a common business envelope a enlarged photo copy of a "Business Card" bold statement about buying CB Linear Amps. This is a CB shop.

RECEIVED

Violations of various subparts 2 - 95 - 97 of the CFR Title 47 and other parts.

MAR 20 2003

I have several pending "RM's" setting on the control desk, that would take care of some of the "Enforcement" issues regarding the "Illegal" and "Export" radios unlicensed radio use.
 Federal Communications Commission
 Office of the Secretary

More and More "FRS" and "MURS" stations are coming on the air every day, that exceed the "Short" range or Ultra Short Range" of the service intent. Radios in the new services can be monitored some 60 miles away, when the normal profile is 2 miles. This is not a "line of Sight" issue like some station on a big HILL!

Programmable high power radio equipment, HAM 8 COMMERCIAL +110 Watt Linear Amps are becoming very common on "FRS" - "GMRS" and "MURS" un-regulated radios.

Printed rule books, for each radios service should be included in the point of retail sale of "CB" - "GMRS" - "FRS" - "Aviation" - "Marine" - "Business" and the "MURS" radio services

A license is a "Contract" with the "Government" of the "Ye-old" days of the past era when the FCC required CB licenses When a "Signed application was sent in the "Contract" to effect stated that the party was "truthful & would obey" the rules. Unregulated mess of what is going on makes it hard for "Legal Stations to Operate"!

A point of sale "Multi-Part" post card application, with no fee, with "Contract" like signature block for end users would be help put the user on notice. That the FCC is out there and the fine's and Jail time for serious violations do exist.

Call this a "permit" to use any of the unlicensed service if you wish, The FCC for general "PR" [Public Relations Reasons] should consider some reasonable and "Cheep" service regulation.

The publications "PR" could list the fines, and some of the most serious cases that have brought on "Jail" and/or "Fines"!

The "FCC" reduced field enforcement staff, and the double up of FCC district field offices and the "Closing" of manned monitoring station to save "Funds" Saved the commission lots of funds! But enforcement of the areas is so "Thin" it would be like having only one "Ambulance" to take care of all the "Auto" accidents in D.C./Virginia / MD each 24 hour period.

The "New H F station, and the "Remount" un-manned monitoring stations are working well that, but with out "Field Enforcement" officers it like having only one Traffic Cop for the "DC Belt way" Per Week!

Funds have to be found and used for some serious areas of enforcement and intelligence1

Thanks,

Dale E. Reich
